Professional Profile: https://githubster808.github.io/tim_washington_professional_profile/

SUMMARY

Highly driven Software Engineer with strong proficiency in Java and hands-on experience building full-stack applications using Spring Boot, Angular, PostgreSQL and Android Studio. AWS Certified Cloud Practitioner with real-world enterprise IT experience supporting and troubleshooting network infrastructure, system reliability, and backend services. Skilled in modular application design and database integration, with proven troubleshooting skills. Seeking to contribute to scalable, high-quality software solutions in a cross-functional and collaborative, engineering-focused and customer-centric environment.

TECHNICAL SKILLS

Languages: Java (primary), Python, JavaScript, TypeScript, SQL, HTML5, CSS3, XML

Frameworks & Tools: Spring Boot, Angular, Node.js, Docker, Maven, Bootstrap

Databases: PostgreSQL, MySQL, SQLite

Source Code Management: Git (basic branching and version tracking)

Cloud & Networking: AWS (Cloud Practitioner), TCP/IP, DNS, VLANs

Tools & Platforms: IntelliJ, VS Code, PyCharm Android Studio, GitHub, GitLab

A.I. Assisted Engineering: Gemini, ChatGPT, Canva

EDUCATION & CERTIFICATIONS

Bachelor of Science in Software Engineering

Western Governors University — April 2026

AWS Certified Cloud Practitioner (Active)

ITIL Foundation Certification (Active)

CompTIA Project+ (Active)

Bachelor of Science in Psychology

Utah Valley University — December 2020, Cum laude

PROFESSIONAL EXPERIENCE

Network Support Technician – University of Arkansas (April 2023 – Present)

- Configure and manage Layer 3 network infrastructure, including VLAN implementation using CLI-based tools
- Troubleshoot network performance issues and outages, collaborating with engineering teams to identify root causes
- Manage DNS and IP addressing using enterprise tools, ensuring system reliability and accuracy
- Monitor systems using LogicMonitor, Auvik and NetDisco to maintain operational stability
- Document technical processes and infrastructure changes
- Gain hands-on experience with enterprise systems and backend infrastructure

Whole Health Coach– Veterans Healthcare System of the Ozarks (Aug 2021 – Sep 2022)

- Coordinated program operations and improved efficiency through communication and documentation
- Maintained secure handling of sensitive data
- Collaborated across teams to support program delivery

PROJECTS

Java Full-Stack Application (Spring Boot, Angular, PostgreSQL, Docker)

- Developed a full-stack application with RESTful backend and Angular frontend
- Implemented modular backend architecture (controllers, services, repositories)
- Integrated frontend/backend using HTTP and JSON
- Containerized application using Docker
- Applied OOP, validation, and error handling

Python Development Projects

- Developed Python scripts for data processing and modular programming practice
- Applied structured logic and control flow as well as unit testing

Android Application Development (Java, Room, SQLite)

- Developed a full-featured Android app enabling users to create vacations and manage associated excursions within defined date constraints
- Implemented a scalable data layer using the Repository pattern with Room (SQLite) and custom DAO queries
- Built dynamic UI components with RecyclerView adapters supporting search, filtering, and report generation
- Enforced data integrity through input validation and constrained logic to reduce SQL injection risk
- Delivered core features including CRUD operations, date-range querying via DatePickers, and relational data management

- Integrated notifications for scheduled events and sharing functionality via SMS and email intents
- Improved maintainability with reusable utility classes, unit testing, and source code management using Git (GitLab) with deployment of Android SDK via GitHub Pages
- Debugged using Logcat

SQL & Database Development

- Designed relational schemas and wrote SQL queries
- Improved data retrieval through structured queries

PROFESSIONAL STRENGTHS

- Experience writing and maintaining technical documentation and diagramming
- Strong communication skills
- Strong analytical, critical thinking, and problem-solving skills
- Extensive collaboration with cross-functional teams focused on aligning efforts with the organization objectives and technical standards
- Networking and infrastructure familiarity
- Adaptable across technologies and frameworks
- Communicating technical information to technical and non-technical stakeholders at various levels in an organization
